## About Sneh Industries

Sneh Industries is Pune's leading manufacturer of concrete products, enriched with an expertise & experience of 5 years. It has been established in Jan 2008, with a core purpose of supporting infrastructure development of the country thereby improving standard of living of the people & enhance the status of nation in the globe.

From Pathways to highways, Office spaces to commercial complexes, small shed to large Industrial premises, Sneha has got eco friendly solutions with its range of products for masonry application like Bricks, Solid Blocks, Hollow Blocks, and Lightweight concrete blocks and variety of Pavers from heavy duty pavers to shot blasted & glossy finish pavers.

Company has strong growth path. It has grown by more than 20 times in last 5 years by following the core values & consistently moving ahead towards accomplishing the vision.

## Executive Directors

Mr. Pravin holds bachelor degree in Instrumentation & control engineering from university of Pune & has experience of about 10 years in working with MNC. He is Six Sigma Green Belt certified & has been Lead Auditor for ISO 9001:2008. He is looking after strategic planning & Sales portfolio of the company. His visionary leadership is taking the organization to next level.

Mr. Amol is determinant & has got excellence in team handling. He is looking after production & daily operations. His execution skill & modus of operandi is helping the organization to grow aggressively.

## Infrastructure

Manufacturing setup has four different locations in Pune. Total factory premise is spread over more than 5 acres of land, having manufacturing capacity of 250 m3 per day (Equals to 70,000 bricks of 6"). All four locations are situated very close proximity to Pune, Pimpri-Chinchwad, Chakan & Hinjewadi, the upcoming strategic locations in Pune.

### **Sneh is equipped with,**

- Five Multicavity Hydraulic Vertical Press machines. All machines are PLC controlled, high speed Automatic machines from renowned OEMs. It has got Batching units alongwith for maintaining the concrete mix proportion constant.
- Two Vibro-Compaction type machineries for casting of Solid & Hollow Blocks.
- CLC manufacturing unit with 25m3/day production capacity.
- Unit of manufacturing Glossy pavers with a capacity of 2500 sqft a day.
- Testing Lab- Automatic compressive test equipment & Density test equipment.
- Curing Chambers with humidifier.
- Transportation Facility- Own vehicles for transporting the material.

## Our USP

- State of the art manufacturing set-up
- Mass Production
- On time Delivery
- Standard Processes for all the functions
- Skilled & Experienced employees
- Visionary leadership
- Quality conscious
- Customer Focus

## *Paving Products*

### Heavy Duty Paving Blocks- Rough Surface

Shape	Colour	Blocks per sq ft	Thickness (mm)	Compressive strength
Zigzag	Grey	3.64	80	M40
			100	M50
4" x 8" Rectangle	Grey	4.20	80	M40

**Zigzag**

**4" x 8" Rectangle**

## Paving Products

### Mat Surface Paving Blocks

Shape	Blocks per sq ft	Thickness (mm)	Compressive strength	Colour
Falcon (I Shape)	3.14	60	M30	Grey, Red, Yellow, Green, Coffee, etc.
		80	M40	
Zigzag (Unipaver)	3.64	60	M30	
		80	M40	
Rectangle- (4" x 8")	4.20	60	M30	
		80	M40	
Square (8" x 8")	2.1	60	M30	
		80	M40	
Square (6" x 6")	4	60	M30	
		80	M40	

Falcon (I Shape)

Zigzag (Unipaver)

Rectangle- (4" x 8")

Square (8" x 8")

## Glossy Surface Paving Blocks (Laquer Finish / Rubber Mould)

Shape	Blocks per sq. ft.	Thickness (mm)	Compressive strength	Colour
Olympia	2.4	60	M35	Grey, Yellow, Green, Coffee, Black etc.
Colorado	2.24	60	M35	
Rectangle (4" x 8")	4.5	60	M35	
Square (8" x 8")	2.25	60	M35	
Square with				
Stone Effect (8" x 8")	2.25	60	M35	
Tourus	2.25	60	M35	
Falcon (I shape)	2.56	60	M35	
Cosmic	2.79	60	M35	
Zig- Zag	2.88	60	M35	

Square (8" x 8")

Stone Effect (8" x 8")

Rectangle- (4" x 8")

Falcon (I shape)

Olympia

Colorado

Tourus

Zig- Zag

## Shot & Sand Blasted Pavers

Specifications & the options are similar to Mat finish pavers

Square (8" x 8")

Rectangle- (4" x 8")

### Applications

Paving Blocks are used for various applications. Choice of the pavers depends on various factors i.e. Traffic load, Aesthetic, Design choice etc.

**Some suggestive guidelines as below**

Applications	Block Types
Roads for heavy vehicles	100 mm Rough Surface Pavers
Roads for moderate load vehicles	80 mm Rough Surface Pavers
Roads for cars	60/80 mm Mat Finish Pavers
Footpath	60 mm Mat Finish/ Glossy Finish Pavers
Parking area	60 mm Mat Finish Pavers
Garden/ Bungalow landscaping	60 mm Mat Finish/ Glossy Finish Pavers
Industries / Warehouses	80 mm/ 100mm Rough Surface Pavers

SNEH INDUSTRIES

### Benefits of Sneh Pavers

- Uniform pave as very less variation in thickness (  $\pm$  2mm)
- Durability due to high strength blocks
- No wastage on site due to good quality blocks, no breakage
- High elegance of the pave as we use imported pigment
- Plenty of options are available as we have range of products
- We offer entire solution- Design to Fixing as we have associate architect & block fixing team

### Advantages of Paving Blocks over Rigid Concrete

- High Abrasion & Skid resistance
- No damage from petroleum products
- No damage from concentrated point loads
- No damages or cracks from high temperature & temperature variations
- No damage from Soap or detergents
- Highly Suitable where high frequency turning or slewing movements
- Appearance & Aesthetic is far superior
- Highly Suitable where ready access to underground services is required
- Highly Suitable where planning may require alteration in the pavement layout

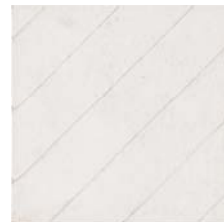

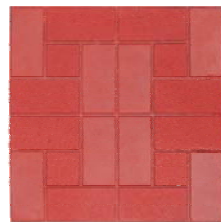

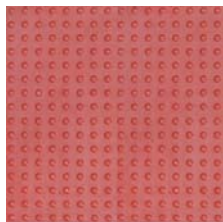

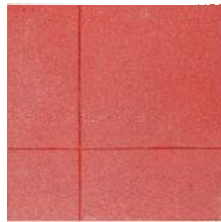

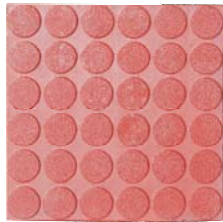

SINTER INDUSTRIES PVT. LTD.

## Tiles

Surface	Size	Thickness	Colour
Matt & Glossy	12"x 12"	25mm	Grey, Red, Yellow,
with variety of	10"x 10"		Green, Coffee,
texture	16"x 16"		Black etc.

## Kerb Stone

### Sizes

Depth	Height	Length
3", 4", 6"	12", 18"	12"

## Masonry Products

### Fly Ash Bricks

Variants	Size (mm)	Compressive strength	Density
6" Brick	230 x 150 x 80	M10	1900 Kg/m <sup>3</sup>
4" Brick	230 x 100 x 80	M10	1900 Kg/m <sup>3</sup>

#### Benefits of Sneh Fly Ash Bricks

- Long life of the construction due to high compressive strength
- Low dead weight on the structure due to low density
- No seepage due to low water absorption
- Size advantage, as it has 5 mm extra on length & thickness
- Eco friendly product as it is made up of recycled material i.e. Fly Ash
- Easy plastering due to rough surface

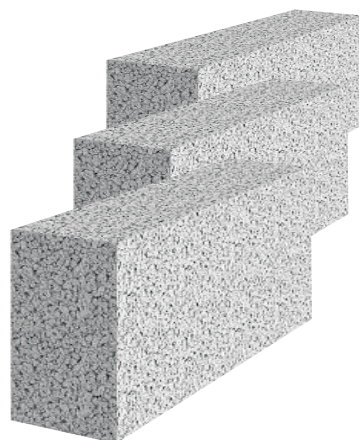

### Solid Blocks

Variants	Size (mm)	Compressive strength	Density
6-8-12	150 x 200 x 300	M5	2300 Kg/m <sup>3</sup>
8-8-12	200 x 200 x 300	M5	2300 Kg/m <sup>3</sup>
4-8-12	100 x 200 x 300	M5	2300 Kg/m <sup>3</sup>

#### Benefits of Sneh Solid Blocks

- Long life of the construction due to high compressive strength
- Faster Masonry due to large size
- Less Consumption of mortar
- Easy plastering due to rough surface
- Thorough solid & there is no cells/tiny voids to inner structure as we use Automatic Vibro-press for manufacturing
- Eco friendly product as it is made up of recycled material i.e. Fly Ash

## Hollow Blocks

Variants	Size (mm)	Compressive strength
8-8- 16 with 4 pockets	200 x 200 x 400	M5

### Benefits of Sneh Hollow Blocks

- Long life of the construction due to high compressive strength
- Faster masonry due to large size of mortar
- Low mortar consumption
- Low dead weight on structure
- Easy plastering due to rough surface
- No block breakage due to 4 pockets
- Eco friendly product as it is made up of recycled material i.e. Fly Ash

## Light Weight Concrete Blocks

Variants	Size (mm)	Compressive strength	Density (Kg/m <sup>3</sup> )
Size-1	200 x 150 x 600	M3 to M5	800- 1200
Size-2	200 x 100 x 600	M3 to M5	800- 1200
Size-3	200 x 200 x 600	M3 to M5	800- 1200

### Benefits of Sneh Light Weight Concrete Blocks

- High durability
- Very useful for high rise building due to low density.
- Easy plastering due to rough surface
- High Thermal insulation. 5 times to normal concrete
- High Sound insulation
- Fire & vermin resistance
- No emission of toxic gases
- Faster masonry due to large size
- Less consumption of mortar
- Eco friendly product as it is made up of recycled material i.e. Fly Ash

## VISION

Serve the infrastructure development of major cities in India by producing concrete product of 5000m<sup>3</sup>/ day by 2025.

## CORE PURPOSE

To support infrastructure development of the country thereby improving standard of living of the people & enhance the status of nation in the globe

## CORE VALUES

- **Continual Improvement**  
Strive to grow an organization in terms of size, services & geography  
Process based approach & continual improvement in processes on positive feedback  
Adopt positive changes
- **Customer Focus**  
Identify, Understand & meet customer needs  
Long term relationship
- **Employee commitment**  
Safe, Secure & Supportive work environment  
Pursue challenging & rewarding work opportunities to nurture personal & professional initiatives & growth  
Recognition to competency
- **Respect to individuals**  
Treat others with dignity, valuing and benefiting from personal differences  
Coach & develop others
- **Society Aid**  
A strong sense of giving back to society by various means
